

SERVICE SCHEDULE

Dear customer

Thank you for choosing a vehicle of our brand.

The information presented below specifies the operations to be carried out in the servicing of your vehicle and correspond to the driving conditions you have foreseen. It allows you to plan the servicing of your vehicle.

The service interval depends on time and mileage. The service is due when the first of the two terms is reached.

The on-board diagnostics may indicate the need to have one of these operations carried out early, by means of a warning lamp.

SERVICING	Normal conditions of use
Services: systematic operations	Every 12500 miles / 2 years
Replacement of the passenger compartment filter	Every 2 years
Replacement of the brake fluid	Every 4 years
Replacement of the reduction gear drive belt	Every 62500 miles / 6 years
Draining of the reduction gear	Every 62500 miles / 6 years

We recommend that you attach this sheet to your vehicle documents; in the event of loss, you can find this information on your smartphone in the application My Citroën after having informed your vehicle there.

Cleaning of the cabin filter :

It is recommended for the customer to carry out the cleaning of the cabin filter after one year of use.
